1. Introduction

This document describes the Signature Validation Policies implemented in the eCON Preservation Service provided by Entaksi Solutions SpA, via la Piana 76, fraz. Pontepetri, 51028 San Marcello Piteglio (PT) (website: <http://www.entaksi.eu>).

The eCON Preservation Service is a trust service providing long-term preservation of digital signatures and general data using digital signature techniques, as defined by eIDAS Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market.

1.1. Document identification

This document is identified by the following OID:

OID	Description
1.3.6.1.4.1.57823.1.4	MAN eCON 20210628 Signature Validation Policy EN 1.0.0

The OIDs identifying the specific signature validation policies are identified within the document.

1.2. Document maintenance

Entaksi has defined a review process for all the internal documents, including policies and practices.

The documents are periodically reviewed under the responsibility of Entaksi management, in order to assess their compliance with national and international requirements, standards, mandatory legislation, regulations in force, particular needs imposed by the technical and technological evolution, evolution of the business context.

The review and any update takes place at least once a year, or whenever one of the following circumstances occurs:

- internal organizational changes that impact on the system;
- major changes to the hardware or software architecture;
- regulatory updates;
- changes in procedures, methodologies or business context.

1.3. Approval and publication

This document and all the internal policies and practices mentioned in it have been approved by Entaksi's Management, published and communicated to employees and, as regards those classified as "public", published on the [company website](#).

Entaksi makes available to all the preservation services customers and to the relying parties any update of this document and other relevant documentation as soon as the update is approved and revised on the basis of what is described in the revision procedure.

Any change that might affect the acceptance of the service by the subject, subscriber or relying parties, will be communicated by Entaksi through the communication channel established in the terms and conditions of the service.

2. Definitions and abbreviations

2.1. Definitions

certificate status authority

authority providing certificate status information.

container

data object, which contains a set of data objects and optional additional information, which describes the contained data objects and optionally its content and its interrelationships.

data object

actual binary/octet data being operated on (e.g. transformed, digested, or signed) by an application and which may be associated with additional information like an identifier, the encoding, size or type.

delta preservation object container

special preservation object container describing the difference to an already existing preservation object container.

EU qualified preservation service

preservation service that meets the requirements for qualified preservation service for qualified electronic signatures and/or for qualified electronic seals as laid down in Regulation (EU) 910/2014.

evidence record

unit of data, which can be used to prove the existence of an archived data object or an archived data object group at a certain time.

expected evidence duration

for a preservation service with temporary storage or without storage, duration during which the preservation service expects that the preservation evidence can be used to achieve the preservation goal long-term: time period during which technological changes may be a concern.

metadata

data about other data.

notification interface

interface provided by the preservation client supporting the notification protocol.

notification protocol

protocol used by a preservation service to notify the preservation client.

preservation client

component or a piece of software which interacts with a preservation service via the preservation protocol.

preservation evidence

evidence produced by the preservation service which can be used to demonstrate that one or more preservation goals are met for a given preservation object.

preservation evidence policy

set of rules that specify the requirements and the internal process to generate or how to validate a preservation evidence.

preservation evidence retention period

for a preservation service With Temporary Storage (WTS) the time period during which the evidences that are produced asynchronously can be retrieved from the preservation service.

preservation goal

one of the following objectives achieved during the preservation time frame: extending over long periods of time the validity status of digital signatures, providing proofs of existence of data over long periods of time, or augmentation of externally provided preservation evidences.

preservation interface

component implementing the preservation protocol on the side of the preservation service preservation manifest: data object in a preservation object container referring to the preservation data objects or additional information and metadata in the preservation object container.

preservation mechanism

mechanism used to preserve preservation objects and to maintain the validity of preservation evidences.

preservation object

typed data object, which is submitted to, processed by or retrieved from a preservation service.

preservation object container

container which contains a set of data objects and optionally related metadata providing information about the data objects and optionally preservation manifest(s) specifying its content and relationships.

preservation object identifier

unique identifier of a (set of) preservation object(s) submitted to a preservation service.

preservation planning

monitoring changes and risks e.g. concerning innovations in storage, access and preservation technologies, new design strategies, etc.

preservation period

for a preservation service with storage, duration during which the preservation service preserves the submitted preservation objects and the associated evidences.

preservation profile

uniquely identified set of implementation details pertinent to a preservation storage model and one or more preservation goals which specifies how preservation evidences are generated and validated.

preservation protocol

protocol to communicate between the preservation service and a preservation client.

preservation scheme

generic set of procedures and rules pertinent to a preservation storage model and one or more preservation goals which outlines how preservation evidences are created and validated.

preservation service

service capable of extending the validity status of a digital signature over long periods of time and/or of providing proofs of existence of data over long periods of time.

preservation storage model

one of the following ways of implementing a preservation service: with storage, with temporary storage, without storage.

preservation submitter

legal or natural person using the preservation client to submit the submission data object.

preservation subscriber

legal or natural person bound by agreement with a preservation trust service provider to any subscriber obligations.

proof of existence

evidence that proves that an object existed at a specific date/time.

proof of integrity

evidence that data has not been altered since it was protected.

signer

entity being the creator of a digital signature.

submission data object

original data object provided by the client.

time-stamp

data in electronic form which binds other electronic data to a particular time establishing evidence that these data existed at that time.

time-stamping authority

trust service provider which issues time-stamps using one or more time-stamping units.

time-stamping service

trust service for issuing time-stamps.

time-stamping unit

set of hardware and software which is managed as a unit and has a single time-stamp signing key active at a time.

trusted list

list that provides information about the status and the status history of the trust services from trust service providers

regarding compliance with the applicable requirements and the relevant provisions of the applicable legislation.

validation data

data that is used to validate a digital signature.

3.1.2. Italian Digital Preservation Regulation

CAD

Legislative Decree No 82/2005 Code for Digital Administration, "Codice dell'Amministrazione Digitale".

AgID "Linee Guida sulla formazione, gestione e conservazione dei documenti informatici"

Official guidelines on the creation, management and preservation of IT documents, issued on 09 September 2020 by the Agenzia dell'Italia Digitale (AgID).

AgID Preservation Service Providers Regulation

"Determinazione" No 455/2021 of the Agenzia dell'Italia Digitale (AgID) of 25 June 2021 on the adoption of "Regolamento sui criteri per la fornitura dei servizi di conservazione dei documenti informatici".

3.1.3. Certifications

Entaksi has obtained the following certifications:

UNI ISO 9001:2015

Quality management systems - Requirements.

ISO/IEC 20000-1:2018

Information technology - Service management - Part 1: Service management system requirements.

ISO/IEC 27001:2013

Information technology – Security techniques – Information security management systems – Requirements.

ISO/IEC 27017:2015

Information technology – Security techniques – Code of practice for information security controls based on ISO/IEC 27002 for cloud services.

ISO/IEC 27018:2019

Information technology – Security techniques – Code of practice for protection of personally identifiable information (PII) in public clouds acting as PII processors.

ISO/IEC 27035:2016

Information technology – Security techniques – Information security incident management.

ISO/IEC 22301:2019

Security and resilience – Business continuity management systems – Requirements.

Sistema di conservazione dei documenti digitali

Digital Preservation Service - art. 24 EU Regulation n° 910/2014 (eIDAS).

ETSI EN 319 401 V2.3.1 (2021-05)

Electronic Signatures and Infrastructures (ESI); General Policy Requirements for Trust Service Providers, policy e requisiti per i fornitori di servizi fiduciari.

ETSI TS 119 511 v1.1.1 (2019-06)

Electronic Signatures and Infrastructures (ESI); Policy and security requirements for trust service providers providing long-term preservation of digital signatures or general data using digital signature techniques, policy e requisiti di sicurezza per servizi fiduciari di conservazione di firme digitali e la conservazione di dati mediante tecniche basate sulla firma digitale.

3.1.4. Data Protection

GDPR

Regulation (EU) No 679/2016 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

3.1.5. Other provisions

ISO/IEC 14721:2012

Space data and information transfer systems – Open archival information system (OAIS) – Reference model.

ETSI TS 119 312 V1.4.1 (2021-08)

Electronic Signatures and Infrastructures (ESI) - Cryptographic Suites.

3.2. Informative references

Entaksi Qualified Long-Term Preservation Service is supported by the following policies:

Tabella 1. eCON Preservation Service Policies

Document name	Document version	Valid from
MAN SIG 20210708 Preservation Service Policy	1.0.0	01/12/2021
MAN eCON 20200628 Signature Validation Policy	1.0.0	01/12/2021
MAN eCON 20200628 Preservation Evidence Policy	1.0.0	01/12/2021
MAN SIG 20200511 Politica per la sicurezza delle informazioni	1.1.0	01/12/2021

Additionally eCON Preservation Service is described in the following practice statements and manuals:

Tabella 2. eCON Preservation Service Documents

Document name	Document version	Valid from
MAN SIG 20210708 Preservation Service Practice Statement	1.0.0	01/12/2021
MAN eCON 20151222 Conservazione	1.7.0	01/12/2021

All the previous enlisted documents are classified as "public" and disclosed to the relying parties on the [company website](#).

Furthermore the subsequent documents illustrate some confidential topics about the eCON Preservation Service, mostly related system security procedures and technical questions.

Tabella 3. eCON Preservation Service Confidential Documents

Document name	Document version	Valid from
MAN eCON 20190918 Piano di cessazione	1.3.0	01/12/2021
MAN eCON 20151222 Piano della sicurezza	1.4.0	01/12/2021

Entaksi, due their confidential content, doesn't disclose these documents and any of its other internal manuals, procedures and security documents. However, according to the company's availability and commitment, it is available to undergo audits by its subscribers or other interested parties, upon signing an un-disclosure agreement.

4. Roles and responsibilities

The **designated community of eCON Digital Preservation Service**, as required by the Open Archival Information System (OAIS) Standard ISO/IEC 14721:2012, is described in the eCON User Manuals, and also are enlisted the roles and activities for each Entaksi's staff member.

Entaksi is appointed as Trust Service Provider for the eCON Long-Term Preservation Service.

The eCON Preservation Service is administrated by various "**Managers**", each of whom covers a very specific role in the company and in the service in particular, in order to better ensure the reliability of the system without overlapping activities and with compartmentalization of roles:

- **Preservation Service Manager.**
- **Archival Function Manager.**
- **Data Protection Manager.**
- **Preservation System Security Manager.**
- **Preservation Information System Manager.**
- **Preservation System Development and Maintenance Manager.**

All the data relating to the persons and specific roles covered by the various managers of the Preservation Service eCON are available in the eCON preservation manual, published both on the [Agenzia per l'Italia Digitale website](#) and on the [Entaksi Website](#).

Conflicting duties and areas of responsibility are segregated to reduce opportunities for unauthorized or unintentional

modification, or misuse of the Entaksi's assets.

Entaksi Solution SpA is responsible for the provision of the service, and the Preservation Service Manager is the role appointed for service delivery tasks.

In accordance with art. 38 of the "Decreto del Presidente del Consiglio dei Ministri del 22 febbraio 2013" (Prime Minister's Decree), the following individuals are appointed in addition to those listed above:

- Security Manager.
- Qualified Service Manager;
- Responsible for the technical management of the systems.
- Responsible for technical and logistical services.
- Responsible for audits and inspections (auditing).

Other roles are defined in "MAN SIG 20210708 Preservation Service Policy" and "MAN SIG 20210708 Preservation Service Practice Statement".

4.1. eCON Preservation Service Signature Validation Policies

The signature validation policies used in the eCON Preservation Service are provided in a machine readable format.

eCON Preservation Service supports the automatic interpretation of a machine readable signature validation policy description language according to technical specifications described in ETSI EN 319 102-1 V1.1.1 (2016-5).

Signature validation policies are described by an XML file that states rules and policies applied during the validation process.

4.1.1. Validation strategy

Signature validation operates according to ETSI EN 319 102-1 V1.1.1 (2016-5) chapter "5.6 Validation process for Signatures providing Long-Term Availability and Integrity of Validation Material".

During the validation procedure all materials needed for long-term validation of the signature are collected resulting in a signature validation report that contains all collected materials and a set of proof of existence of the signature at the time of validation.

4.1.2. Validation policies

The Entaksi Signature Validation Policies are identified by the following OIDs:

OID	Description
1.3.6.1.4.1.57823.2.3.1	eCON Signature Validation Policy 2022-01

4.1.3. Policies description

The policies describe a process that validates electronic signatures and indicates whether they are Advanced electronic Signatures (AdES), AdES supported by a Qualified Certificate (AdES/QC) or a Qualified electronic Signature (QES). All certificates and their related chains supporting the signatures are validated against the EU Member State Trusted Lists (this includes signer's certificate and certificates used to validate certificate validity status services - CRLs, OCSP, and time-stamps).

The policies contain rules and validation parameters that might change over time following the recommendations in updated versions of ETSI TS 119 312 V1.4.1 (2021-08).

Signature Validation Policy 2022-01

The "Signature Validation Policy 2022-01" identified by OID 1.3.6.1.4.1.57823.2.3.1 contains rules and validation parameters as of January 2022.

The XML file describing the signature validation policy is available at the following address: <https://r.entaksi.eu/oids/1.3.6.1.4.1.57823.2.3.1>.

This Signature Validation Policy XML file follows ETSI EN 319 102-1 V1.1.1 (2016-5) requirements. The validation procedure takes this file as input for applying defined rules and validation parameters from this file, and it produces a validation report according to the format defined in ETSI TS 119 102-2 V1.1.1 (2016-5).

This Signature Validation Policy uses the shell validation model in that all certificates must be valid at validation time.

5. Other provisions

5.1. Compliance and Audit

The applicable legal system is declared in [References](#).

The configuration of the eCON Preservation Service is regularly checked by the management to avoid any change which violate Entaksi's security policies.

Entaksi's eCON Preservation Service is supervised by the Agenzia dell'Italia Digitale (AgID), which has the responsibility of regularly checking and revising the compliance of the system at the requirements defined in accordance with the Italian

regulations on digital preservation.

Moreover, the system is checked by at least yearly by an accredited certification body, recognized by [Accredia](#), the Italian Accreditation Body.

Audit working papers and inspection documents are classified as confidentials.

The conformity certificates and their updates are published on the [Entaksi website](#) in accordance with the assessment results.

Other provisions are defined in "MAN SIG 20210708 Preservation Service Policy" and "MAN SIG 20210708 Preservation Service Practice Statement".
